Polyflex Overlap.
Schlemmer Innovation.

Unique to use.
Our newly patented Polyflex Overlap can be combined as an overlapping corrugated tube with all Schlemmer system parts such as manifolds and connector interfaces. A perfect fit and high pull-out forces of the system parts ensure optimum hold.

In addition, reduced ovality and a compressed geometry ensure shape accuracy.

APPLICATION
- Easy and uncomplicated assembly.
- The optimal closure technology (U profile) and a larger overlap area ensure a secure hold of the lines during rotation and bending of the corrugated tube.
- Optimum protection of the cables by blunting concealed slit edge.
- High flexibility when laying with narrow radii in a complex installation space.

PRODUCT ADVANTAGES
- Securely sealed, even with small bending radius
- Easy to assemble
- Robust
- Flexible

CERTIFICATIONS
- LV 312*
- RoHS
- FVMSS 302
- UL94
- REACH
* In test according to revision status of the delivery specification
Polyflex Overlap

**CHARACTERISTICS**

**Temperature range**
- 3,000 h: -40°C to 135°C
- 500 h: -40°C to 150°C

**Flame retardancy**
- UL94: HB
- According to FMVSS 302: self-extinguishing

**Colour**
- Black, others on request

**Material**
- PPmod, others on request

**Profile**
- normal

**Innovative production**

Unlike in conventional techniques, the infrared process does not use electric heat and subsequent cooling with air, as this only acts on the surface. In contrast to this, in the production of the Polyflex Overlap, we focus on holistic production by means of infrared technology with subsequent water cooling. This creates a homogeneous material and sustainable shaping. This ensures a „deep impact“!

**Schlemmer cable management**

Our core competence is smart and innovative solutions for your cable management. We offer a wide range of versatile system parts for almost every cable management application. Of course, this also includes solutions for optimal cable routing in a complex installation space: reliable over long distances or in a high-temperature range.

For this purpose, we use our comprehensive product portfolio which is manufactured using injection moulding as well as extrusion processes.

**The Schlemmer Group** is a global technology expert, which has focused on the development and production of highly specialised synthetics and metal solutions. Building on 60 years of experience in cable protection, the group of companies headquartered in Upper Bavaria has become one of the leading and most comprehensive value added providers, supporting its clients as an intelligent consulting and service partner. In addition to the core Automotive business area, the Schlemmer Group also pursues activities in a wide range of other sectors with its Industry business area.
