

# Tube and fitting.

## A clean performance.

### Schlemmer in the Food Industry.

Guaranteeing food safety is a highly responsible task because foods are an ideal breeding ground for microorganisms and can be contaminated with residues and pollutants that threaten our health. For this reason, there are strict hygiene requirements (for example, FDA CFR 21 and NSF 51),

which all equipment used for the preparation and processing of foodstuffs must comply with. When cleaned as perfectly as possible, the risk of infections, diseases, contagions or injuries is excluded or at least reduced to a minimum. You can now make a specific contribution towards this goal.

### OUR OFFER

#### Targeted prevention provides maximum safety.

In our extensive product range, you will also find the full-plastic „ANACONDA Sealtite NMFG“ tube and the matching „Anaconda Food-Fitting“. They are easy to install and safe to use because these special tubes and fittings have been developed specifically for use in the food, beverage and pharmaceutical industries. Thus, you and your company are always on the safe side.

### PRODUCT ADVANTAGES

#### PROTECTIVE TUBE

- Smooth surface
- Easy cleaning
- Minimised risk of bacteria formation
- High flexibility

#### FITTINGS

- High corrosion protection (stainless steel AISI-316 1.4401)
- High IP rating
- Smooth exterior finish
